

DEPARTMENT OF AGRICULTURE

AGENCY: Natural Resources Conservation Service, Commodity Credit Corporation

ACTION: NOTICE

Conservation Innovation Grants Fiscal Year (FY) 2015 Announcement for New York State Program Funding – Catalog of Federal Domestic Assistance (CFDA) Number: 10.912

SUMMARY: New York Natural Resources Conservation Service (NRCS), an agency under the United States Department of Agriculture (USDA), is announcing availability of Conservation Innovation Grants (CIG) to stimulate the development and adoption of innovative conservation approaches and technologies. **Applications are accepted for projects located entirely within the State of New York.** NY NRCS anticipates that the amount available for support of this program in FY 2014 will be approximately \$150,000. Applications are requested from eligible governmental or non-governmental organizations or individuals for competitive consideration of grant awards for projects between 1 and 3 years in duration.

Funds will be awarded through a two-phase nationwide competitive grants process that will include (1) a pre-proposal process and (2) a full proposal process. The full proposal process will only be open to applicants whose pre-proposals are selected by NRCS. Both phases are described in this announcement, but **only pre-proposals are being solicited at this time.**

This notice identifies the objectives, eligibility criteria, and application instructions for CIG projects. Applications will be screened for completeness and compliance with the provisions of this notice. Incomplete applications will be eliminated from competition, and notification of elimination will be mailed to the applicant. **NRCS will request a full proposal package only from those applicants selected in the pre-proposal phase.**

DATES: Applications for the pre-proposal phase must be received by NRCS before 4:00 p.m. Eastern Standard Time (EST) on **June 1, 2015**. NRCS will announce selected pre-proposal applications by **June 19, 2015**. Selected applicants will then be required to submit a full proposal package to NRCS by 4:00 p.m. EST on **July 24, 2015**.

ADDRESS: The address for submitting pre-proposals and applications by mail is listed below.

USDA Natural Resources Conservation Service
Conservation Innovation Grants Program
441 South Salina St., Suite 354,
Syracuse, NY 13202.

To submit your application electronically, visit www.grants.gov. Apply for Grants and follow the instructions. **Note: All applicants who submit electronically are strongly encouraged to ALSO submit a paper copy through the methods listed above** to ensure that any potential problems with the electronic submission system do not negatively impact applications.

Applications submitted by email or fax will not be considered for the NY CIG.

For more information contact: Tammy Willis, Assistant State Conservationist – Programs (ASTC-Programs), USDA NRCS, 441 South Salina St., Suite 354, Syracuse, NY 13202. Phone (315)477-6508. Email: tammy.willis@ny.usda.gov.

SUPPLEMENTARY INFORMATION

I. FUNDING OPPORTUNITY DESCRIPTION

A. Legislative Authority

The Conservation Innovation Grants (CIG) program is authorized as part of the Environmental Quality Incentives Program (EQIP) (16 U.S.C. 3839aa-8). The Secretary of Agriculture delegated the authority for the administration of EQIP, including CIG, to the Chief of the Natural Resources Conservation Service (NRCS), who is Vice President of the Commodity Credit Corporation (CCC). EQIP is funded and administered by NRCS under the authorities of the CCC.

B. Overview

The purpose of CIG is to stimulate the development and adoption of innovative conservation approaches and technologies, while leveraging the Federal investment in environmental enhancement and protection in conjunction with agricultural production. CIG projects are expected to lead to the transfer of conservation technologies, management systems, and innovative approaches into NRCS technical manuals and guides or to the private sector. CIG is used to apply or demonstrate previously proven technology in order to increase adoption with an emphasis on opportunities to scale proven, emerging conservation strategies. CIG promotes sharing of skills, knowledge, technologies, and facilities among communities, governments, and other institutions to ensure that scientific and technological developments are accessible to a wider range of users.

CIG funds projects targeting innovative on-the-ground conservation, including pilot projects and field demonstrations. **CIG does not fund research projects, with the exception of on-farm conservation research.** On-farm conservation research is defined as an investigation conducted to answer a specified conservation-related question using a statistically valid design, while employing farm-scale equipment on farm fields. Specifically, a valid study design will use an appropriate number of replications and statistical analysis of results.

NRCS will accept proposals under this notice for single or multiyear projects, not to exceed three years, submitted by eligible entities from New York. Eligible entities include Indian Tribes, State and local units of government, non-governmental organizations, and individuals.

A two-phase evaluation process will be utilized for proposals submitted under this notice. The first phase requires the applicant to submit a pre-proposal. Pre-proposals will be screened for completeness and compliance with the provisions of this notice. Incomplete and/or noncompliant pre-proposals will be eliminated from competition, and notification of elimination will be sent to the applicant. NRCS staff will evaluate complete pre-proposals based on how they demonstrate the use of innovative technologies and/or approaches to address at least one of the topics provided in section I.D. of this notice.

NRCS will only request a full proposal package from those applicants selected in the pre-proposal process. Complete proposals received by applicable deadlines will be evaluated by a technical peer review panel based on the Proposal Evaluation Criteria identified in the instructions in section VI.B. The Review Panel will make recommendations for project approval to the State Conservationist- who will make the final selections.

C. Innovative Conservation Projects or Activities

For the purposes of CIG, the proposed innovative project or activity must encompass the development, field testing, evaluation, implementation, and monitoring of the following:

- Conservation adoption approaches or incentive systems;
 - Promising conservation technologies, practices, systems, procedures, or approaches;
- or

- Environmental soundness with goals of environmental protection and natural resource enhancement.

Projects or activities under CIG must comply with all Federal, State, and local regulations throughout the duration of the project and:

- Make use of proven technology or a technology that has been studied sufficiently to indicate a high probability for success,
- Demonstrate, evaluate, or verify environmental (soil, water, air, plants, energy and animal) effectiveness, utility, affordability, and usability of conservation technology in the field,
- Adapt conservation technologies, management, practices, systems, procedures, approaches, and incentive systems to improve performance, and encourage adoption,
- Introduce conservation systems, approaches, and procedures from another geographic area or agricultural sector, or
- Demonstrate transferability of knowledge.

D. New York State CIG Categories

Natural Resources Funding Pool

For the purpose of this section, NRCS is seeking proposals to stimulate the development of natural resources improvements to include at least one of the categories and bulleted topics listed below.

Pre-proposals that demonstrate the use of innovative technologies and/or approaches to address at least one bulleted topic listed below will be considered. Pre-proposals must identify the most appropriate bulleted topic the innovation/technology is addressing. While NRCS is interested in receiving general proposals for each bulleted topic below, special interest is placed on receiving proposals that address topics identified as a "Priority Need." Additional topics (not listed below) may be considered at the State Conservationist's discretion. If an additional topic is proposed for the State Conservationist's consideration, it must be identified as such in the pre-proposal.

Projects Benefitting Historically Underserved Producers, Veteran Farmers or Ranchers, or Organizations Comprised of or Representing these Individuals or Entities (i.e. Outreach)

- Technology transfer.
- Demonstration of new or novel technology that can easily and inexpensively be adopted.
- Projects that assess resource conditions and land capabilities.
- Projects that emphasize program outreach.
- Projects that develop technical training.

a) Aquatic Resources

- Demonstrate and quantify the impact of conservation approaches and technologies most useful for addressing ocean resources—particularly coastal wetlands and coral and oyster reefs—while achieving USDA conservation goals.

b) Economics and Sociology

- Demonstrate the impacts of conservation practices and suites of conservation practices on net revenue, net cost, and yield variability (or other measures of economic risk). Methods to demonstrate these impacts may include both case studies and enterprise budgets.

- Develop and demonstrate individual enterprise budgets/case studies for a range of major agricultural systems, production zones, and management practices (e.g. comparing no-tillage vs. tillage, cover crops vs. no cover crops; rotations vs. continuous cropping).
- Develop a tool for measuring economic returns of conservation for landowners. Tools should be useful for analyzing and demonstrating the financial costs and potential returns of alternative conservation practices, taking into account such factors as land characteristics and production potential. Tools should adhere to the Agricultural and Applied Economics Association standards for estimating farm costs and returns, including estimating opportunity costs for operator labor and management, be easy to use and understand, and provide transparent calculations.
- Develop a tool for assessing the economics of conservation that includes a defensible and acceptable valuation of environmental benefits and identification of knowledge gaps.
- Demonstrate, through coordinated case studies, how conservation efforts have benefited landowners and rural communities in different regions.
- Evaluation of the sociological/economic/farm management barriers to adoption and demonstration of ways to overcome those barriers for several conservation practices including: implementation of nutrient management plans, adoption of manure injection technologies, installation of stream bank fencing or riparian buffers, adoption of precision livestock feeding or precision grazing practices, manure redistribution, and/or other practices that landowners appear reluctant to adopt.
- Demonstrate and evaluate the conservation and economic value/advantages of sensor-based input management for crop production.
- Demonstrate and quantify the economics of intensive grazing systems.

c) Nutrient Management and Water Quality

- Demonstrate and quantify the optimal combinations of nutrient source, application rate, placement, and application timing (4 Rs of nutrient management), as measured by impact on nutrient use efficiency and yield for one or more of the following crops: corn, soybeans, wheat, vegetables, hay/pasture, cotton, and/or rice. Demonstrations are encouraged that show how these optimal combinations change for one or more of the following comparisons: irrigated vs. non-irrigated management, conventional tillage vs. reduced tillage systems, manure-amended vs. non manure-amended systems, and/or organic vs. conventional production systems.
- Demonstrate and quantify the effectiveness of bundling conservation measures to avoid, control, and trap nutrient losses from the field.
- Demonstrate and quantify the effectiveness of methods to capture dissolved phosphorus from field runoff and subsurface drainage.
- Demonstrate the applicability and utility of in-season nitrogen management tools for determining additional nutrient needs for a range of soils, climates and/or cropping systems.
- Demonstrate technologies that can improve cost efficiency of transporting manure nutrients from regions of dense populations of animal agriculture operations to areas with low densities of animal operations that have demand for manure nutrients.

- Demonstrate innovative techniques for keeping liquid manure applied via irrigation, surface application, or injection from entering subsurface drainage systems through macro pores.
- Demonstrate new alternatives to manure application to frozen or saturated soils.
- Demonstrate suite(s) of conservation practices and document the conditions for their optimal use in protecting surface and ground water quality if manure or nutrients were to be applied to frozen soil.

d) *Energy Conservation*

- Evaluate and demonstrate renewable energy systems (e.g., hydropower, solar, and/or wind) that offset fossil fuel energy use and meet on-farm energy needs, while increasing energy efficiency and/or reducing environmental contaminants (e.g., greenhouse gas emissions, particulate matter).
- Develop and demonstrate innovative planning and decision aids to assess potential impacts of small on-farm renewable energy systems on wildlife and wildlife habitats and that can be used to identify appropriate sites to avoid or minimize potential adverse impacts.
- Develop and/or demonstrate innovative implementation systems to achieve greater use and quantify benefits of energy audits that address cropland, buildings, and equipment.

e) *Soil Health*

- Demonstrate and quantify impacts of soil health promoting practices (e.g., no-tillage, cover crops, crop rotations) on yield, yield variability, and economics of crop production across a range of soils, cropping systems, and climates. Methodologies for demonstration may include case studies and enterprise budgets.
- Demonstrate and quantify the impacts of cover crops, crop rotations, tillage and/or soil amendments on soil chemical, physical, and/or biological properties their relationships with nutrient cycling, soil water availability, and plant growth.
- Demonstrate and quantify the ability of soil health assessments (e.g., Cornell Soil Health Assessment, Haney Soil Health Nutrient Tool) to inform fertility recommendations for meeting crop nutrient needs, and relate to other economic and environmental outcomes (e.g., yield, yield stability, input cost, risk, water quality, greenhouse gas emissions).
- Demonstrate and quantify the rate of increase in available soil water-holding capacity as a function of soil properties (e.g., particle size, mineralogy), management practices (e.g., tillage, amendments, cover crop or crop residue inputs), and/or climate.
- Development of optimal species mixes, seeding rates and seeding methods (e.g., inter-seeding, inter-cropping, frost-seeding) to enhance cover crop establishment/survival and increase soil organic matter.
- Quantify and demonstrate the impacts of Soil Health Management Systems on nutrient losses through surface and subsurface pathways for tile-drained and non-drained soils.

- Development of a decision support tool that incorporates the impacts of crop residue/cover crop quality parameters (e.g., cellulose, lignin, C/N) on decomposition and nutrient turnover for designing Soil Health Management Systems that optimize nutrient availability, control soil-born diseases, and increase available soil water holding capacity.
- Demonstrate and quantify the potential increases in water availability and reductions in nutrient losses given widespread adoption of soil health promoting practices such as cover crops and no-tillage.
- Demonstrate and quantify the impacts of cover crop presence, species mix, and management (e.g., termination growth stage, tillage practice) on soil water content and subsequent crop yield across a range of climates and cropping systems.
- Demonstrate and quantify the impacts of Soil Health Management Systems (e.g., cover crops, reduced tillage) on key soil health attributes (e.g., available water holding capacity, disease suppression, nutrient cycling) and determine the extent to which the rates of change are influenced by climate, organic input, chemical composition/placement, and soil properties (e.g., particle size, mineralogy). This should be conducted across a range of inherent soil properties, cropping systems, and climates to develop a Decision Support Tool that promotes selection and design of the components of a Soil Health Management System.
- Demonstrate innovative approaches for adopting soil health promoting practices in relatively cool and/or wet climates (e.g., zone tillage, short season cultivars).
- Demonstrate and quantify at a watershed scale the water quality impacts of installing conservation systems that support and improve soil health.
- Demonstrate pasture cropping techniques, seeding rates, equipment needs for improving soil and animal health in grazing systems.
- Demonstrate and quantify the impacts of grazing systems on soil health.

f) Herbicide Weed Resistance

- Demonstrate and evaluate voluntary herbicide resistance management implemented by groups of farmers in communities impacted by or that wish to prevent/delay evolution of herbicide resistance in weeds.

II. NY CIG FUNDING AVAILABILITY

The intent of the NY State CIG is to provide flexibility to the State Conservationist to target CIG funds to individual producers and smaller organizations that may possess promising innovations but may not compete well on the larger scale of the National CIG grants competition.

For FY 2015, NY NRCS will consider offering CIG in the following areas: Nutrient Management, Soil Health, Economics and Sociology and Environmental Markets. NRCS anticipates that the amount available for support of this program in FY 2015 will be up to \$150,000.00.

CIG will fund single and multiyear projects, **not to exceed 3 years** (anticipated project start date of **October 1, 2015**). Funds will be awarded through a nationwide competitive grants process. **The maximum award amount for any project will not exceed \$75,000 in FY 2015.** Funding availability and application submission information will be announced through www.grants.gov website and the NY NRCS website at www.ny.nrcs.usda.gov.

III. PROGRAM REQUIREMENTS AND INFORMATION

A. Applicant Eligibility

CIG applicants must be a federally recognized Indian Tribe, State or local unit of government, non-governmental organization, or an individual.

B. Project Eligibility

To be eligible, projects must involve producers who meet the EQIP eligibility requirements set forth in § 1466.6(b)(1) through (3). Additional information regarding EQIP eligibility requirements can be found at:

<http://www.nrcs.usda.gov/wps/portal/nrcs/main/national/programs/financial/eqip>. Participating producers are not required to have an EQIP contract.

C. Matching Funds Requirements

Selected applicants may receive CIG grants of up to 50 percent of their total project cost not to exceed \$75,000. CIG recipients must provide non-Federal funding equal to the amount of Federal funds requested. Non-Federal funds must be derived from cash and/or in-kind sources.

Matching funds must be secured at time of application. Proposals should include written verification of commitments of matching support (including both cash and in-kind contributions) from third parties. Additional information about matching funds can be found at [2 CFR 215](#).

D. EQIP Payment Limitation and Duplicate Payments

The following payment requirements apply to CIG:

- CIG funds are awarded through grant agreements. These grant agreements are not EQIP contracts; thus, CIG awards in and of themselves are not limited by the payment limitation found at section 1240G of the Food Security Act of 1985, 16 U.S.C. 3839aa-7, which imposes a \$450,000 payment limitation for all payments made to persons or legal entities under an EQIP contract entered into between FY 2014 and FY 2018.
- All agricultural producers receiving a direct or indirect payment through participation in a CIG project must meet the eligibility requirements of 7 CFR § 1466.6(b)(1) through (3).
- In addition, section 1240B of the Food Security Act of 1985, 16 U.S.C. 3839aa-2, prohibits duplicative payments. Accordingly, direct or indirect payments cannot be made for a practice for which an individual or legal entity has already received funds, or is contracted to receive funds through any USDA conservation program (e.g., Conservation Reserve Program, EQIP, Agricultural Management Assistance, Conservation Security Program, Conservation Stewardship Program, and Wildlife Habitat Incentive Program).

To participate in EQIP financial assistance, an individual or entity must meet the eligibility requirements in 7 CFR § 1466.6, which include the following:

Criteria	Potential Verification Documentation*
Be in compliance with the highly erodible land and wetland conservation provisions (7 CFR Part 12)	Documentation of their compliance status can be obtained by the producer at their local USDA Service Center or through the USDA customer service on-line portal
Have an interest in a farming operation as defined in 7 CFR Part 1400	Documentation of their interest in a farming operation can be obtained by the producer at their local USDA Service Center or through the USDA customer service on-line portal showing that the producer has established farm records
Have control of the land for the term of the proposed contract period	Documentation can be provided in the form of a deed, lease, or other documents which show the producer has adequate control for the term of the proposed contract period
The average adjusted gross income of the individual, joint operation, or legal entity may not exceed \$900,000	If using FY 2014-2018 CIG funding, documentation of a producer's Adjusted Gross Income (AGI) eligibility status can be obtained by the producer at their local USDA Service Center, or through the USDA customer service on-line portal.

*Many of the verification documents will require that the producer have current records established with the Farm Service Agency or require that the producer establish new records.

E. Activities Limitation and Implementation

Technologies and approaches that are eligible for funding in a project's geographic area through EQIP are ineligible for CIG funding except where the use of those technologies and approaches demonstrates clear innovation. The burden falls on the applicant to sufficiently describe the innovative features of the proposed technology or approach. Applicants should reference the State's EQIP Eligible Practices List.

CIG is designed to provide financial assistance to grantees. Procurement of any technical assistance required to carry out a project is the responsibility of the grantee. Technical oversight for grant projects will be provided by a Federal technical representative who will be designated by NRCS. NRCS will also designate a Program Contact and Administrative Contact for each project.

**Beginning or Limited Resource Farmers or Ranchers, or Indian Tribes, or
Community- based organizations comprised of or representing these entities**

For the FY 2015 CIG award process, up to 10 percent of the total funds available for CIG may be set-aside for applications from Historically Underserved Producers (Beginning Farmers or Ranchers, and Limited Resource Farmers or Ranchers), recognized Indian tribes or community-based organizations comprised of or representing these persons or entities. Up to three-fourths of such an applicant's required matching funds (up to 37.5 percent of the total project cost) may derive from in-kind contributions. This exception is intended to help Beginning Farmers or Ranchers, Limited Resource Farmers or Ranchers, and Federally recognized Indian tribe meet the statutory requirements for receiving a CIG.

To compete for these set-aside funds, the applicant must make a declaration in the application as described in Part V.A.10. of this notice. Applications that are unsuccessful in the set-aside competition will automatically be placed in the general application pool for consideration. Funds not used in the set-aside pool will revert back into the general funding pool. Listed are the regulatory definitions of a Beginning Farmer or Rancher and a Limited Resource Farmer or Rancher, which are found at [7 CFR 1466.27](#):

Beginning Farmer or Rancher - a person or legal entity who:

- Has not operated a farm or ranch, or who has operated a farm or ranch for not more than 10 consecutive years. This requirement applies to all members of an entity who will materially and substantially participate in the operation of the farm or ranch;
- In the case of a contract with an individual, individually, or with the immediate family, material and substantial participation requires that the individual provide substantial day-to-day labor and management of the farm or ranch consistent with the practices in the county or State where the farm is located; and
- In the case of a contract with an entity or joint operation, all members must materially and substantially participate in the operation of the farm or ranch. Material and substantial participation requires that each of the members provide some amount of the management or labor and management necessary for day-to-day activities, such that if each of the members did not provide these inputs, operation of the farm or ranch would be seriously impaired.

<http://www.nrcs.usda.gov/wps/portal/nrcs/main/national/people/outreach/slbfr>

Limited Resource Farmer or Rancher

- A person with direct or indirect gross farm sales not more than \$155,200 in each of the previous 2 years (adjusted for inflation using Prices Paid by Farmer Index as compiled by National Agricultural Statistical Service); and
- Has a total household income at or below the national poverty level for a family of four, or less than 50 percent of county median household income in each of the previous 2 years (to be determined annually using Department of Commerce data).

<http://www.nrcs.usda.gov/wps/portal/nrcs/main/national/people/outreach/slbfr>

IV. SUBMISSION INFORMATION FOR PRE-PROPOSALS

All standard forms necessary for CIG submission are posted on the following Web site:
[Grants.gov - Forms Repository](http://www.grants.gov).

A. How to Obtain Materials

The announcement for this CIG funding opportunity can be found on the following web sites:
www.grants.gov and New York website:
<http://www.nrcs.usda.gov/wps/portal/nrcs/site/ny/home/>.

B. Pre-proposal Content and Format

Pre-proposals must contain the content, format, and information set forth below to receive consideration for funding. Applicants should not assume prior knowledge on the part of NRCS or others as to the relative merits of the project described in their application.

Applicants must submit only one original copy of the pre-proposal in the following format:

- Each page must be on numbered 8½" x 11" white paper that has one-inch margins; and
- Text must be typed single spaced in a font no smaller than 12-point. Pre-proposal

Pre-proposals that fail to comply with the required content and format will not be considered for funding. If submitting applications for more than one project, submit a separate pre-proposal for each project. Material exceeding stated page limits will not be considered.

1. **Application Form:** (Standard Form 424 Application for Federal Assistance)

Applicants must use this document as the cover sheet for each project proposal. Standard Form 424 can be downloaded from [Grants.gov - Forms Repository](http://www.grants.gov). NRCS will communicate via email with the person identified in the "Name and contact information/telephone number of person to be contacted on matters involving this application" block regarding invitations to submit full proposals – ensure that an email address is provided.

2. **Project Summary:** (Three (3)-page maximum.) Applicants must submit a description including the information below:

- a. Project title;
- b. Primary area for consideration (refer to page 3) and why;
- c. Project duration (anticipated project start date of **October 1, 2015**, not to exceed three years);
- d. Project director name, and contact information (including address, email, and telephone number);
- e. Names and affiliations of project collaborators;
- f. Project background (describe the issue or problem and how the project addresses it innovatively as defined in Section I.C. - one paragraph)
- g. Project objectives (purpose and goals);
- h. Project methods (methodology, tools, and processes)
- i. Project geographic area/location (where project activities will take place)
- j. Project deliverables/products ;(**Ensure all deliverables are measurable**)
- k. Description of EQIP eligible producer involvement. Applicants must include a statement indicating that the proposed project will involve EQIP eligible producers and describe and certify their type and level of involvement in the project. Projects that do not involve EQIP eligible producers are ineligible for a CIG award.

3. **Budget Information:** (Standard Form 424A Budget Information Non-Construction Programs).
 - a. Fill in all spaces as appropriate. Section B, Item 6, Column 1 should reflect the NRCS funds and Column 2 should reflect the applicant's matching funds. Applicants must prepare this document to identify budget needs. The SF-424 is available at: Grants.gov - Forms Repository.
 - b. **Budget Narrative:** (One (1)-page maximum.) A narrative describing the budget needs and justifying why the budget is appropriate should also be included.

Note: Please note that we understand these are preliminary figures at this point. If the application is approved for full submission there may be differences once the full details of the budget are developed. Please include \$3,000 in the project budget for grantee's travel to NRCS-designated events. These funds are required and can be part of the Federal portion, the cost share, or both.

C. How to Submit an Application

Applicants may submit applications electronically through Grants.gov or by hard copy- either submitted in person or via express mail, overnight courier service or U.S. Postal Service. Pre-proposals must contain all of the elements of a complete package and meet the requirements described. Instructions for electronically submitting the required standard forms, and instructions for adding attachments are posted on Grants.gov. Grants.gov provides date and time stamps on pre-proposals submitted through its Web site. All pre-proposals, regardless of how they are submitted, must be received by New York State identified deadline.

Note: NRCS is not responsible for any technical malfunctions or Web site problems related to Grants.gov or emailed submissions. Applicants should begin the Grants.gov process or send their email in advance of the submission deadline to avoid problems.

The address for submitting pre-proposals by hard copy in person, by US Postal Service or other delivery service is:

USDA, Natural Resources Conservation Service
Conservation Innovation Grants Program
441 South Salina Street, Suite 354
Syracuse, NY 13202

Note: Applicants must submit only one signed original copy of each project pre-proposal. Pre-proposals submitted by email or fax will not be considered. The use of Federal Government postage-paid envelopes, email and/or equipment in submissions is a violation of Federal law and will disqualify you from consideration.

D. Pre-Proposal Due Date

Pre-proposals must be received by **4:30pm on June 1, 2015**. The applicant assumes the risk of delays in application delivery. Applicants are strongly encouraged to submit completed pre-proposals early via email to ensure timely receipt by NRCS.

E. Acknowledgement of Submission

NRCS will acknowledge receipt of timely pre-proposals via email. An applicant who does not receive such an email acknowledgement within 30 days of their submission, but believes he/she submitted a timely pre-proposal, must contact the NRCS program contact within 30 days of submission deadline. Failure to do so will result in the pre-proposal not being considered.

NY CIG Program Contact:

Tammy Willis - NY State Assistant State Conservationist - Programs

USDA, Natural Resources Conservation Service

441 South Salina Street, Suite 354

Syracuse, NY 13202

E-mail: tammy.willis@ny.usda.gov

Phone: (315)477-6503

F. Withdrawal

Applicants or their authorized representative may withdraw a pre-proposal by written notice at any time before selections are made.

G. Pre-proposal Review

Pre-proposals will be evaluated by NRCS, Federal partners, and non-Federal partner agency staff under the funding pool and primary/first category identified by the applicant. Each pre-proposal will be screened for completeness and compliance with the provisions of this notice, including EQIP payment limitations. Incomplete and/or noncompliant pre-proposals will be eliminated from competition and notification of elimination will be sent to the applicant.

For the purposes of CIG, the proposed innovative project or activity must promote environmental protection or natural resources enhancement, and encompass development and pilot field testing, evaluation, and/or implementation of:

- Conservation adoption incentive systems, including market-based systems, or
- Promising conservation technologies, practices, systems, procedures, or approaches.

The innovative projects or activities under CIG must comply with all Federal, State, and local regulations throughout the duration of the project and:

- Make use of proven technology or a technology that has been studied sufficiently to indicate a high probability for success,
- Demonstrate, evaluate, or verify environmental (soil, water, air, plants, energy and animal) effectiveness, utility, affordability, and usability of conservation technology in the field,
- Adapt conservation technologies, management, practices, systems, procedures, approaches, and incentive systems to improve performance, and encourage adoption,
- Introduce conservation systems, approaches, and procedures from another geographic area or agricultural sector, or
- Demonstrate transferability of knowledge.

NRCS staff will evaluate complete pre-proposals based on how they demonstrate the use of innovative technologies and/or approaches to address at least one of the topics provided in section I.D. of this notice.

H. Anticipated Notification

Applicants will be notified via mail when pre-proposal selections are made by **June 19, 2015**. Applicants selected for full proposals will be required to submit a full proposal package by **4:30pm on July 24, 2015**.

I. APPLICATION AND SUBMISSION INFORMATION FOR FULL PROPOSALS (only for those applicants notified at the end of the pre-proposal review process that their application has been identified for further evaluation).

All standard forms necessary for CIG submission are posted on the following Web site: Grants.gov - Forms Repository.

A. Content and Format

Proposals must contain the content, format, and information set forth below to receive consideration for funding. Applicants should not assume prior knowledge on the part of NRCS or others as to the relative merits of the project described in their application.

Applicants must submit only one original copy of the application in the following format:

- Each page must be on numbered 8½" x 11" white paper that has one-inch margins; and
- The text of the application must be typed single spaced in a font no smaller than 12-point.

Proposals that fail to comply with the required content and format will not be considered for funding. Material exceeding stated page limits will not be considered. Proposals must include all required forms and narrative sections described below. Incomplete and/or noncompliant proposals will not be considered.

1. **Application Form:** (Standard Form 424 Application for Federal Assistance) Applicants must use this document as the cover sheet for each proposal. Standard Form 424 can be downloaded from Grants.gov - Forms Repository.
2. **Project Executive Summary—** (One (1)-page maximum.) Provide the project title, applicant entity name, funding requested, primary area for consideration (refer to page 3 – the primary/first area identified for consideration will determine the technical peer review group that the proposal is assigned to) and describe in non-technical language the issue/problem and how the project addresses it innovatively through its objectives (one paragraph - note that this will be used for publicity related to the selection announcement for successful proposals) methods, environmental outcomes, participating partners, deliverables, and any potential negative impacts.
3. **Project Description:** (Fifteen (15)-page maximum.) The description must include the following information:
 - a. **Project background:** Describe the issue or problem, and the history of, and need for, the proposed innovation. Provide evidence that the proposed innovation has been studied sufficiently to indicate a high probability for success of the project.
 - b. **Project objectives:** Be specific using qualitative and quantitative measures, if possible, to describe the project's purpose and goals. Describe how the project is innovative.
 - c. **Project methods:** Describe clearly the methodology of the project and the tools or processes that will be used to implement the project.

- d. Geographic location and size of project or project area: Describe the geographic location of the project and the relative size and scope (e.g., acres, farm types, demographics, etc.) of the project area. Provide a map, if possible.
- e. EQIP eligible producer participation: Estimate the number of EQIP eligible producers involved in the project, and describe the type and extent of their involvement (Note: Producers receiving direct or indirect payments through participation in a CIG project must also meet the EQIP eligibility requirements).
- f. Project action plan and timeline: Provide a table listing project actions, timeframes, and associated milestones through project completion. Anticipated project start date of October 1, 2015.
- g. Project management: Give a detailed description of how the project will be organized and managed. Include a list of key project personnel, their relevant education or experience, and their anticipated contributions to the project. Explain the level of participation required in the project by government and non-government entities. Identify who will participate in monitoring and evaluating the project.
- h. Project deliverables/products: Provide a list of specific deliverables and products that will allow NRCS to monitor project progress and payment. The proposal shall include a set of technical deliverables designed to evaluate the performance and broader applicability of the project being proposed for implementation. In addition to project-specific deliverables, selected applicants will be required to provide the following:
 - 1. Semi-annual progress reports;
 - 2. Supplemental narratives that explain and support payment requests;
 - 3. A final report;
 - 4. Performance items specific to the project that indicate progress; [A thorough list and explanation of measurable performance items specific to the project will be used in the technical evaluation (refer to "CIG Technical Evaluation Criteria")].
 - 5. A new technology and innovative approach fact sheet;
 - 6. A draft practice standard, if appropriate; and
 - 7. Participation in at least one event within New York State which showcases the CIG grant (NY NRCS must be notified of the event)
- i. Benefits or results expected and transferability: Identify the results and benefits to be derived from the proposed project activities, and explain how the results will be measured. Identify project beneficiaries, i.e., agricultural producers by type, region, or sector; historically underserved producers and communities; rural communities; and municipalities. Explain how these entities will benefit. In addition, describe how results will be communicated to others via outreach activities.
- j. Project evaluation: Describe the methodology or procedures to be followed to evaluate the project, determine technical feasibility, and quantify the results of the project for the final report. Grant recipients will be required to provide a semi-annual progress report, quarterly financial reports, and a final project report to NRCS. Instructions for submitting reports will be detailed in the grant agreement.

4. **Assessment of Environmental Impacts:** Will implementation of the proposal have physical, chemical or biological impacts on the environment? If so, describe in general terms what they will be and how extensive they will be. The description of the potential environmental impacts must address beneficial and adverse impacts of the proposed action. The length of the description should be commensurate with the complexity of the project proposed and the natural environmental resources impacted directly, indirectly, or cumulatively. Where possible, information on environmental impacts should be quantified, such as number of acres of wetlands impacted, amount of carbon sequestration estimated, etc. Natural environmental resources include soil, water, air, plants, and animals, as well as other resources protected by law, regulation, Executive Order, and agency policy. These resources are outlined in the NRCS Environmental Evaluation Worksheet, form NRCS-CPA-52.

Note #1: Please be aware that proposals for projects with potentially adverse impacts to natural resources may need to be modified in order to achieve acceptable and beneficial levels of environmental impact. NRCS may choose not to select projects that cannot be modified.

Note #2: Please be aware that applicants must permit NHPA Section 106 review and consultation by NRCS State or Area Office with required consulting parties (such as the pertinent SHPO and federally recognized Tribes) prior to the implementation of conservation practices and/or activities for their potential to affect cultural resources.

5. **Budget Information:** (Twelve (12)-page maximum.) The budget portion of the application consists of the two parts described below:
- a. Standard Form (SF) 424A Budget Information- Non-Construction Programs: Fill in all spaces as appropriate. Section B, Item 6, column 1 should reflect the NRCS funds and Column 2 should reflect the applicant's matching funds. This form is the summary budget for the project.
 - b. Detailed Budget Narrative: Provide a detailed narrative in support of the budget for the project, broken down by each project year. Discuss how the budget specifically supports the proposed activities. Explain how budget items are essential to achieving project objectives. Justify the project cost effectiveness and include justification for personnel and consultant salaries with a description of duties. In addition, any subcontractors and consultants must also submit a statement of work. The budget narrative should support the Federal funds requested and the applicant's matching funds.

The format of this information, which can be in a chart, spreadsheet, table, etc., should be readable in 8 ½" by 11" printable pages. The information needs to be presented in such a way that the evaluators and NRCS can readily understand what expenses will be incurred to support the project. The breakdown of the Federal share and matching funds should be shown separately as in the SF-424A, not combined.

Note: Please include \$3,000 in the project budget for travel designated by NRCS. These funds are required and can be part of the Federal portion, the applicant's matching funds, or both. Please identify whether the funds are part of the Federal portion, the cost share, or both.

6. Indirect Costs

- a. Applicants wishing to claim indirect costs must have a federally approved indirect cost rate. The approved indirect cost rate must be included in the application package.
 - b. An indirect cost rate not to exceed 15 percent may be approved for applicants without a preexisting, federally approved indirect cost rate. To be considered for an indirect cost rate not to exceed 15 percent, applicants must submit an indirect cost rate proposal with the application that includes the following:
 1. Applicant's written policy for allocating and identifying direct and indirect costs;
 2. The contact information of the person who prepared proposal;
 3. Breakdown of indirect salaries by position title and amount;
 4. Line item expenditure descriptions describing how the costs are being allocated between direct and indirect costs;
 5. Applicant's tax identification number; and
 6. Signed certification attesting that (i) all costs in proposal are allowable under the Office of Management and Budget (OMB) cost principles; (ii) costs treated as indirect have not been claimed as direct; (iii) similar types of costs have been accounted for consistently; and (iv) the applicant will notify the Federal Government of any account changed that would affect the rate. This certification should be signed by the applicant's approving official or the applicant's chief financial officer.
 - c. If applicant does not have a federally approved indirect cost rate, it is at NRCS' discretion whether to allow indirect cost.
7. **Matching:** Proposals must include written verification of commitments of matching support (including both cash and in-kind contributions) from non-Federal third parties.

Cash Match

For third-party cash contributions, a separate pledge agreement is required for each contribution, signed by the authorized organizational representative of the contributing organization and the applicant organization, which must include: (1) the name, address, and telephone number of the contributor, (2) the name of the applicant organization, (3) the title of the project for which the contribution is made, (4) the dollar amount of the cash contribution, and (5) a statement that the contributor will pay the cash contribution during the grant period.

In-Kind Match

"In-kind" refers to non-cash contributions of goods or services made by third-party individuals or organizations to support projects. Examples of "in-kind" contributions include work done by unpaid volunteers and donations of supplies, facilities, or equipment. In-kind contributions must be necessary to accomplish program activities and verifiable.

For any third-party in-kind contributions, a separate pledge agreement is required for each contribution, signed by the authorized organizational representatives of the contributing organization and the applicant, which must include:

(1) the name, address, and telephone number of the contributor, (2) the name of the applicant's organization, (3) the title of the project for which the contribution is made, (4) a good faith estimate of the current fair market value of the third-party in-kind contribution, and (5) a statement that the contributor will make the contribution during the grant period.

The value of applicant contributions to the project will be established in accordance with the applicable cost principles. Applicants should refer to OMB Circulars and Cost Principles for additional guidance and other requirements relating to matching and allowable costs.

8. **List of Letters of Support:** Include entity name, location, role, and if a commitment of cash or in-kind support has been made, the type (cash vs. in-kind) and value.

Note: NRCS may conduct reference checks to ensure that organizations identified are supportive and involved with the project.

9. **Declaration of Previous CIG Projects Involvement and Past Performance:** Identify any previously awarded National or State CIG projects related to this proposal and any of their principal investigators and please respond to item 9.a below. If you have never received an NRCS CIG, but have received other Federal or non-Federal assistance agreements (an assistance agreement is a grant or cooperative agreement and not a contract), please respond to item 9.b below. If you have never received any type of Federal or non-Federal assistance agreements, please indicate this in your proposal.

a. Applicant has previously received an NRCS CIG

Identify the NRCS CIG(s) you currently have or have received in the past. Detail the purpose, outcomes to date, and how this new proposal relates to the previous award. For up to the five most recent projects (if within the past two years), demonstrate how you successfully managed the grant(s), and successfully performed all phases of work under the previous or existing grant(s), including whether the desired outcomes of the project(s) were met by providing information on the following:

1. Funds Expenditure: the balance of grant funds currently remaining.
2. Describe your compliance with grant requirements, including, but not limited to, information regarding your compliance with the work plan, schedule, terms and conditions, and timely reporting (e.g., semiannual progress reports, financial status reports, and any other required submittals).

Accomplishments: Describe your success using NRCS grant funds, including whether you reported accomplishments to NRCS.

b. Applicant has received other Federal and/or non-Federal assistance agreements

1. Identify current and/or prior federally and/or non-federally funded assistance agreements. Please provide information on no more than five of your most recent assistance agreements (if received within the past two years).

Describe your history of successfully managing these agreements and performing the agreements including meeting and complying with reporting requirements, submitting final acceptable technical reports, and reporting on whether you were making progress towards achieving the results under those agreements and, if not, whether you explained why.

10. **Certifications:** Standard Form (SF) 424B - Assurances, Non-construction Programs. All proposals must include this document. The SF-424B may be found at: Grants.gov - Forms Repository or by contacting the State office. In addition, applicants, by signing and submitting an application, assure and certify that they are in compliance with the following Federal regulations:
- 2 CFR Part 417, [Government wide Debarment and Suspension \(Non-procurement\)](#)
 - 7 CFR Part 3018, [New Restrictions on Lobbying](#)
 - 2 CFR Part 421, [Government wide Requirements for Drug Free Workplace \(Financial Assistance\)](#)

B. Additional Pre-award Requirements

The following items must be obtained prior to entering into an agreement with the Federal Government but do not need to be provided in the proposal. Applicants are encouraged to apply early for their Data Universal Numbering System (DUNS)/System for Award Management (SAM) number.

1. **DUNS Number:** A Dun and Bradstreet (D&B) DUNS number is a unique nine-digit sequence recognized as the universal standard for identifying and keeping track of over 70 million businesses worldwide. CIG applicants must obtain a DUNS Number. Information on how to obtain a DUNS number can be found at: <http://fedgov.dnb.com/webform> or by calling 1-866-705-5711. Please note that the registration may take up to 14 business days to complete.
2. **SAM:** Official U.S. Government system that consolidated the capabilities of CCR/FedReg, ORCA, and EPLS. To register, go to: <https://www.sam.gov/portal/public/SAM/>. Please allow a minimum of 5 days to complete the SAM registration.

C. How to Submit an Application

Applicants may submit proposals electronically through Grants.gov mail the proposal to the address listed below. Alternatively, proposals may be submitted via express mail, overnight courier service, or U.S. Postal Service to the addresses listed below. All proposals must contain all of the elements of a complete package and meet the requirements described above. Instructions for electronically submitting the required standard forms, and instructions for adding attachments are posted on Grants.gov. Grants.gov provides date and time stamps on proposals submitted through its Web site. All proposals regardless of how they are submitted must be received by **4:30pm on July 24, 2015**. Emailed proposals must be received by NRCS before the submission deadline.

Note: NRCS is not responsible for any technical malfunctions or Web site problems related to Grants.gov or emailed submissions. Applicants should begin the Grants.gov process or send their email in advance of the submission deadline to avoid problems.

The address for submitting proposals via the United States Postal Service is:

USDA-NRCS, CIG Program

Tammy Willis - NY State Assistant State Conservationist - Programs

USDA, Natural Resources Conservation Service

Conservation Innovation Grants Program

441 South Salina Street, Suite 354

Syracuse, NY 13202

Note: Applicants must submit only one signed original copy of each proposal. Proposals submitted by fax will not be considered. The use of Federal Government postage-paid envelopes, email and/or equipment in filing proposals is a violation of Federal law and will disqualify you from consideration.

D. Due Date

Proposals must be received by the address above **by 4:30 p.m. on July 24, 2015**. The applicant assumes the risk of any delays in application delivery. Applicants are strongly encouraged to submit completed proposals early via email to ensure timely receipt by NRCS.

E. Acknowledgement of Submission

NRCS will acknowledge receipt of timely proposals via email. An applicant who does not receive such an email acknowledgement within 30 days of their submission, but believes he/she submitted a timely proposal must contact the NRCS program contact below within 30 days of submission deadline. Failure to do so will result in the proposal not being considered.

NY CIG Program Contact:

Tammy Willis - NY State Assistant State Conservationist - Programs

USDA, Natural Resources Conservation Service

441 South Salina Street, Suite 354

Syracuse, NY 13202

E-mail: tammy.willis@ny.usda.gov

Phone: (315)477-6503

F. Withdrawal

Proposals may be withdrawn by written notice at any time before selections are made. Proposals may be withdrawn by the applicant, or by an authorized representative.

G. Funding Restrictions

Awardees may not use unrecovered indirect costs as part of their matching funds.

CIG funds may not be used to pay any of the following costs unless otherwise permitted by law, or approved in writing by the Authorized Departmental Officer in advance of incurring such costs:

1. Costs above the amount of funds authorized for the project;
2. Costs incurred prior to the effective date of the grant;
3. Costs which lie outside the scope of the approved project and amendments thereto;
4. Entertainment costs, regardless of their apparent relationship to project objectives;

5. Compensation for injuries to persons, or damage to property arising out of project activities;
6. Consulting services performed by a Federal employee during official duty hours when such consulting services result in the payment of additional compensation to the employee; and
7. Renovation or refurbishment of research or related spaces, the purchase or installation of fixed equipment in such spaces, and the planning, repair, rehabilitation, acquisition, or construction of buildings or facilities.

This list is not exhaustive. Questions regarding the allowances of particular items of cost should be directed to the administrative contact person listed on Part VI.

H. Review

Proposals will be screened for completeness and compliance with the provisions of this notice. Incomplete and/or noncompliant proposals will be eliminated from competition, and notification of elimination will be sent to the applicant. Complete proposals will be evaluated by a technical peer review panel based on the Proposal Evaluation Criteria identified in the proposal instructions in section VI.B.

Proposals, along with their technically based recommendations from the peer review groups will then be forwarded to the New York technical peer review groups. The review group will make its recommendations for project approval to the NRCS State Conservationist who will make the final selections.

I. Patents and Inventions

Allocation of rights to patents and inventions shall be in accordance with [2 CFR regulation under \(Intellectual Property\)](#). This regulation provides that small businesses normally may retain the principal worldwide patent rights to any invention developed with USDA support. In accordance with 7 CFR 3019.2, this provision will also apply to commercial organizations for the purposes of CIG. USDA receives a royalty-free license for Federal Government use, reserves the right to require the patentee to license others in certain circumstances, and requires that anyone exclusively licensed to sell the invention in the United States must normally manufacture it domestically.

J. Natural Resources and Historic Property Review Requirements

1. The Council on Environmental Quality's National Environmental Policy Act (NEPA) regulations at 40 CFR parts 1500-1508 and the NRCS regulation that implements NEPA at 7 CFR part 650 require that an environmental review be prepared for Federal actions that may have environmental effects. NRCS financial assistance under the CIG program requires compliance with these regulations. As part of the application packet, applicants are required to provide environmental information pertaining to their project if there will be actions with potential to affect the environment to help NRCS determine the appropriate documentation required to comply with NEPA and NRCS regulations. If the application is selected for funding, the NRCS Program Contact, Technical Contact and NRCS Environmental Liaison will coordinate with the selected applicant concerning documentation for compliance with NEPA.

The selected applicant will be required to prepare and pay for the preparation of the appropriate NEPA document (e.g., Environmental Assessment or Environmental Impact Statement if required for NEPA compliance). Grant funding cannot be approved until the environmental review requirements demonstrating compliance with NEPA are met.

2. The National Historic Preservation Act (NHPA) Section 106 and its implementing regulations (36 CFR Part 800), and other related authorities, require federal agencies to determine if a project has the potential to cause an effect to historic properties and, if yes, if they are adverse and how the effects may be addressed. This NHPA review and compliance in accordance with Section 106 of the NHPA and implementing regulations at 36 CFR Part 800 must be completed by NRCS and may not be delegated. This compliance process includes consultation with SHPOs, Tribes, THPOs, NHOs, and the appropriate preservation community regarding identification, evaluation of NRHP eligibility, evaluation of effects, and if the effects are adverse, treatment. This treatment may include avoidance or other forms of mitigation of adverse effects. This mitigation will occur after the grant is awarded but before it is implemented.

II. APPLICATION REVIEW AND NOTIFICATION INFORMATION

A. Review and Selection Process

A two-phase evaluation and review process will be utilized for proposals submitted under this notice. The first phase requires the applicant to submit a pre-proposal application. Pre-proposals will be screened for completeness and compliance with the provisions of this notice. Incomplete and/or noncompliant pre-proposals will be eliminated from competition, and notification of elimination will be sent to the applicant. NRCS staff will evaluate complete pre-proposals based on how they demonstrate the use of innovative technologies and/or approaches to address at least one of the topics provided in section I.D. of this notice.

NRCS will only request a full proposal package from those applicants selected in the pre-proposal process. There are three steps in evaluating full CIG proposals. First, proposals will be divided among technical peer review groups based on primary/first area for consideration identified in the Executive Summary and then will be reviewed by a Technical Peer Review Panel. The Technical Peer Review Panel consists of NRCS national technical specialists, and technical specialists from other appropriately related Federal agencies, and non-Federal agencies. Proposals will be reviewed based on the CIG Proposal Evaluation Criteria listed in Part VI.B below.

The Technical Peer Review Panel will forward their recommendations and the proposals to a New York STATE Review Board, which will certify the peer review panels' recommendations and ensure that the application evaluations are consistent with program objectives. The New York STATE Review Board will also consider findings from review by State Conservationists or their delegates before forwarding its recommendations to the NRCS State Conservationist for final review and selection.

Proposal Evaluation Criteria

For the purposes of CIG, the proposed innovative project or activity must promote environmental protection or natural resources enhancement, and encompass development and pilot field testing, on-farm research and demonstration, evaluation, and/or implementation of:

- Conservation adoption incentive systems, including market-based systems, or
- Promising conservation technologies, practices, systems, procedures, or approaches.

Projects or activities under CIG must comply with all Federal, State, and local regulations throughout the duration of the project and:

- Make use of proven technology or a technology that has been studied sufficiently to indicate a high probability for success,
- Demonstrate, evaluate, or verify environmental (soil, water, air, plants, energy and animal) effectiveness, utility, affordability, and usability of conservation technology in the field,
- Adapt conservation technologies, management, practices, systems, procedures, approaches, and incentive systems to improve performance, and encourage adoption,
- Introduce conservation systems, approaches, and procedures from another geographic area or agricultural sector, or
- Demonstrate transferability of knowledge.

The Technical Peer Review Panels will use the following criteria to evaluate project proposals:

1. Purpose, Approach, and Goals

- a. Design and implementation of project based on sound methodology and demonstrated technology.
- b. Promotes environmental enhancement and protection in conjunction with agricultural production.
- c. Project outcome is clearly measurable.
- d. Potential for successful completion.
- e. Both beneficial and adverse impacts are considered and an acceptably significant level of improvement will be achieved.

2. Innovative Technology or Approach

- a. Project is innovative (national, regionally, and/or local in nature).
- b. Project conforms to description of innovative projects or activities in Announcement for Program Funding.

3. Project Management

- a. Timeline and milestones are clear and reasonable.
- b. Project staff has technical expertise needed.
- c. Budget is adequately explained and justified.
- d. Experience and capacity to partner with and gain the support of other organizations, institutions and agencies.

4. Benefits and Transferability

- a. Potential for producers and landowners to use the innovative technology/approach or technologies/approaches.
- b. Potential to transfer the approach or technology nationally or to a broader audience or other geographic or socio-economic areas.
- c. Potential for successful transfer, through planned project activities, to historically underserved producers and communities.

- d. Potential for NRCS to successfully use the innovative approach or methods.
- e. Project will result in the development of technical or related technology transfer materials (technical standards, technical notes, guide sheets, handbooks, software, etc.).

B. Other Factors

In making final selection recommendations from among the most highly qualified applicants NRCS's Selection Official may consider the following factors if, and as, appropriate.

- A balanced distribution of funds among the states and territories.
- A balanced distribution of projects across resource concerns.
- Appropriate participation by Historically Underserved Producers, Veteran Farmers or Ranchers or community based organizations comprised of or representing these entities.
- Whether full participation by historically underserved individuals and groups will be achieved.
- Fair distribution of funds between urban and non-urban areas.

C. Anticipated Announcement and Award Dates

NRCS anticipates announcing CIG selections by **August 14, 2015**, and awarding all grants by **October 1, 2015**. However, NRCS will not distribute any funds, and grantees cannot begin work until the parties execute an appropriate CIG agreement.

Applicants should plan their projects based on a project start date of **October 1, 2015**.

D. Unsuccessful Proposals

Applicants whose proposals are not selected for funding will be notified of their status within 30 days of the announcement of CIG selections.

III. AWARD ADMINISTRATION INFORMATION

A. Award Notification

Applicants who have been selected for funding will receive official notification from the New York State Office. However, all selections are contingent upon successful completion of the environmental, cultural and historic properties/resources review process by the appropriate NRCS State or Area Office and financial review.

Note: Appropriations Restrictions: Awards made under this solicitation are subject to the provisions contained in the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2012 (P.L. No. 112-55), Division A, Sections 738 and 739, regarding corporate felony convictions and corporate Federal tax delinquencies.

B. Grant Agreement

Through NRCS, CCC will use a grant agreement with selected applicants to document participation in the CIG component of EQIP.

The grant will permit the NRCS National Technical Contact to be involved in overseeing the work performed by the selected recipients. Although NRCS will negotiate precise terms and conditions as part of the award process, the anticipated Federal involvement for this project may include:

- close monitoring of the recipient's performance to verify the results
- collaborating during performance of the scope of work
- reviewing substantive terms of proposed contracts
- reviewing qualifications of key personnel (NRCS will not select employees or contractors employed by the award recipient)
- reviewing and commenting on reports prepared under the agreement (the final decision on the content of reports rests with the recipient)

C. Natural Resources and Historic Property Review Requirements

1. Upon notification of selection, the applicant must contact the [NRCS State Office Environmental Liaison](#) to determine the scope and level of NEPA documentation required for the project. The environmental documentation prepared to meet NEPA requirements must be prepared prior to implementing activities with grant funds.

Selected applicants may be required to prepare and pay for the preparation of the appropriate NEPA document(s) if an Environmental Assessment or Environmental Impact Statement is needed. Grant funds cannot be awarded until the environmental review requirements demonstrating compliance with NEPA are met.

Grant funds cannot be awarded until the environmental review requirements demonstrating compliance with NEPA are met. The NRCS Environmental Liaison for New York is Edward Henry. He may be contacted by phone at (315)477-6529 or by email: Edward.henry@ny.usda.gov.

2. Upon notification of selection, the recipient must contact the NRCS State Office to discuss if National Historic Preservation Act (NHPA) Section 106 review is needed. The NRCS State Conservationist and appropriate staff, including the State Resources Conservationist, Cultural Resources Specialist (CRS) or Coordinator (CRC) will help and, under the direction of the State Conservationist, are responsible for completing this compliance, consultation and review. Additionally, in accordance with Section 106 of the NHPA, implementing regulations for Section 106 (36 CFR Part 800), and with USDA regulations on consultation with Tribes, and related authorities, the NRCS State Conservationist, using appropriate historic preservation staff such as the CRS or CRC, shall consult with concerned federally recognized Indian Tribes and the State Historic Preservation Officer). NRCS may not delegate or assign consultation with Tribes or the SHPO to the recipient or other parties and must carry out agency historic preservation responsibilities quickly as possible and prior to implementation of the grant project by the recipient. The State Office may have programmatic agreements in place to help facilitate and streamline this process. State CRSs and CRCs have extensive experience in determining if Section 106 review and compliance is needed. If Section 106 review and compliance is needed, it must be completed prior to expenditure of funds.

D. Reporting Requirements

Selected applicants will be required to submit a SF-425, Federal Financial Report to the NRCS administrative contact, no later than 30 days after the end of each quarter and 90 days after completion of project. In addition, every 6 months the selected applicant must submit a written performance progress report to the NRCS program, technical, and administrative contacts. This report is distinct from the quarterly financial report described above. Each progress report shall cover work performed during the previous 6-month period and include, at a minimum:

- Project Status:
 - Summary of progress, including the results to date and a comparison of actual accomplishments with proposed goals (milestones) for the period and, where project output can be quantified, a computation of the costs per unit of output
 - Current problems or unusual developments or delays
 - Reasons why goals and objectives were not met, if appropriate

- Additional pertinent information including, where appropriate, analysis and explanation of cost overruns or high unit cost
- Any time extensions
- Any changes to the project's original objectives, methods, or timeline with a summary of the justification for the changes
- Lessons learned that inform future project activities or broader efforts in the project's topic area
- Work to be performed during the next six month period
- Project Results
 - Any preliminary results that can be used by NRCS for practice-standard revisions, policy changes, program revisions and training opportunities.
 - Products/software tools and/or technologies currently ready for adoption and/or transfer
 - Potentially promising products/software tools and/or technologies not yet ready for adoption and/or transfer, and a description of what is needed to reach that maturity.
 - Identification of new data or research needs to inform broader efforts in the project's topic area
 - Project activities that have been featured on recipient or partner Web sites and success stories that could be amplified by NRCS
- EQIP Requirements
 - Provide the following in accordance with the Environmental Quality Incentives Program (EQIP) and CIG agreement provisions:
 - A listing of EQIP-eligible producers involved in the project, identified by name and social security number or taxpayer identification number;
 - A self-certification statement indicating that each individual or entity receiving a direct or indirect payment for any structural, vegetative, or management practice through this grant is in compliance with the adjusted gross income (AGI) and highly-erodible lands and wetlands conservation (HEL/WC) compliance provisions of the Farm Bill.

he final report is due to the NRCS program, technical, and administrative contacts 90 days after completion of the project. This report is distinct from the performance progress reports described above. The final report will summarize the project and describe methods, quality control, findings, and recommendations. Additional information, forms, and templates can be found at

<http://www.nrcs.usda.gov/wps/portal/nrcs/detailfull/national/programs/financial/cig/?cid=stelprd1045412>.

E. Freedom of Information and Privacy Act

Applicants should be aware that some or all of the information submitted in their application may be subject to public disclosure through the Freedom of Information Act (FOIA). Applicants are advised to mark confidential information, such as proprietary information, to prevent disclosure.

V. OTHER INFORMATION

CONSERVATION INNOVATION GRANTS FISCAL YEAR 2015 PRE-PROPOSAL PACKAGE CHECK LIST

Important: Pre-proposals Missing Any of These Required Items Will Not Be Considered

- ☐ 1. **Application Form:** Submit Standard Form 424 Application for Federal Assistance
- ☐ 2. **Project Summary:** Submit a description including the information below (Three (3) pages maximum in length).
 - a. Project title;
 - b. Primary area for consideration (refer to page 3) and why;
 - c. Project duration (anticipated project start date of **October 1, 2015**, not to exceed three years);
 - d. Project director name, and contact information (including address, email, and telephone number);
 - e. Names and affiliations of project collaborators;
 - f. Project background (describe the issue or problem and how the project addresses it innovatively as defined in Section I.C. - one paragraph)
 - g. Project objectives (purpose and goals);
 - h. Project methods (methodology, tools, and processes)
 - i. Project geographic area/location;
 - j. Project deliverables/products; and
 - k. Description of EQIP eligible producer involvement.
- ☐ 3. **Budget Information:** Submit Standard Form 424A Budget Information Non-Construction Programs.
 - a. Complete SF-424A, and
 - b. One page narrative

**CONSERVATION INNOVATION GRANTS
FISCAL YEAR 2015 FULL APPLICATION PACKAGE CHECK LIST**

Important: Proposals Missing Any of These Required Items Will Not Be Considered

- ☐ 1. **Application Form:** Submit Standard Form 424 Application for Federal Assistance.
- ☐ 2. **Project Executive Summary**—in one page or less, **provide the project title, applicant entity name, funding requested, primary area for consideration (refer to page 3), and** describe in non-technical language the issue or problem and how the project addresses it innovatively through its objectives (one paragraph), methods, environmental outcomes, participating partners, deliverables, and any potential negative impacts.
- ☐ 3. **Project Description:** (15 pages maximum, single-spaced, single-sided, 12 point font)
 - a. Project background
 - b. Project objectives
 - c. Project methods
 - d. Geographic location and size of project area (include a map if possible)
 - e. EQIP eligible producer participation (Note: Producers receiving direct or indirect payments through participation in a CIG project must also meet the EQIP eligibility requirements)
 - f. Project action plan and timeline
 - g. Project management
 - h. Project deliverables/products
 - i. Benefits or results expected and transferability
 - j. Project evaluation
- ☐ 4. **Assessment of Environmental Impacts**
- ☐ 5. **Budget Information:** Submit a completed Standard Form 424A (SF-424A) Budget Information-Non-Construction Programs.
 - a. Complete SF-424A
 - b. Detailed budget narrative
- ☐ 6. **Indirect Costs:** Submit documentation of federally approved indirect cost rate or indirect cost rate proposal if claiming indirect costs.
- ☐ 7. **Matching:** Submit written verification of commitments of matching support from non-Federal third parties.
- ☐ 8. **List of Letters of Support:** Include entity name, location, and if a commitment of cash or in-kind support has been made, the type (cash vs. in-kind) and value.
- ☐ 9. **Declaration of Previous CIG Projects Involvement and Past Performance**
- ☐ 10. **Certifications:** Complete Standard Form 424B (SF-424B) Assurances-Non-Construction Programs.

The U.S. Department of Agriculture (USDA) prohibits discrimination against its customers, employees, and applicants for employment on the bases of race, color, national origin, age, disability, sex, gender identity, religion, reprisal, and where applicable, political beliefs, marital status, familial or parental status, sexual orientation, or all or part of an individual's income is derived from any public assistance program, or protected genetic information in employment or in any program or activity conducted or funded by the Department. (Not all prohibited bases will apply to all programs and/or employment activities.)

To file a complaint of discrimination, complete, sign and mail the [USDA Program Discrimination Complaint Form \(PDF\)](#), found online at http://www.ascr.usda.gov/complaint_filing_cust.html, or at any USDA office, or call (866) 632-9992 to request the form. Send your completed complaint form or letter to us by mail at:

USDA
Office of the Assistant Secretary for Civil Rights
1400 Independence Avenue, S.W.
Washington, D.C. 20250-9410

Or by email at program.intake@usda.gov.

Individuals who are deaf, hard of hearing or have speech disabilities and you wish to file either an EEO or program complaint please contact USDA through the Federal Relay Service at (800) 877-8339 or (800) 845-6136 (in Spanish).

Persons with disabilities who wish to file a program complaint, please see information above on how to contact us by mail directly or by email. If you require alternative means of communication for program information (e.g., Braille, large print, audiotape, etc.) please contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).
